VIRGINIA GROWN KING

The New King Cotton—earliest, most productive, quick growing. Want you to use a Sample Bag and have first-hand information. Want you to get a taste of what this wonderful King Cotton will do in making you extra money. Thousands of Tests will be made this year, so that the whole Cotton Belt may know about its superiority and then it promises to be the last word in cotton to beat the weevil and to make more cotton to the acre under any and all conditions.

1/4 Actual Size

Sam Cranshaw, Decoy, Texas, says: "Planted a five-acre bag and made 3 1/2 extra bales."

C. M. Greene, Humboldt, Tenn., says: "Planted a five-acre bag and made 3 extra bales."

MAKES COTTON CROP IN SPITE OF THE WEEVIL

See what U. S. Government says about it—Bulletin No. 212, page 25.

"The importance of the use of selected early fruiting varieties as compared with the native rundown Gin Seed was well illustrated in those investigations on the plantation of Captain B. D. Wilson at Hetty, Texas, under conditions of severe Boll worm injury *early planted King Seed produced an average of 1,348 pounds per acre of seed cotton as against 187 pounds per acre of early planted, but late maturing Gin Seed.*"

A 5-acre bag has in numerous tests made over 3 extra bales. Think of what that means! See above letters. We have many others—received over 2,000 testimonials in one month.

Use 1 5-acre bag and get 1 extra bale is \$200.00 at present price.

Use 3 5-acre bags and get 3 extra bales is \$600.00 at present price.

Use 5 5-acre bags and get 5 extra bales is \$1,000.00 at present price.

Let us send you full particulars of our Agency Plans. Get up Club Order and get your Seed FREE.

Prices retail: 5-acre bag, freight paid by us—\$9.00.

Sample 1/4-acre bag and 30 papers vegetable seed—\$1.50.

Small patch sample bag by parcel post for 16 cents.

Act at once. Make a full crop this year. White Cotton is around 35c.—40c. by October, in our opinion.

"Uncle Sam" says: Bulletin No. 344—Get your seed from originator when possible. Our Mr. King is originator.

Bulletin No. 848, U. S. Department of Agriculture, by L. O. Howard, Chief of the Bureau of Entomology, dated August, 1917, page 25:

"Use of Early Varieties of Cotton: 'Fully as important as early preparation and fertilization in obtaining an early crop of cotton is the use of *Early Varieties*.'"
